

INVERCARGILL CITY COUNCIL

Electing 12 City Councillors

Lindsay THOMAS

My principal place of residence is in the INVERCARGILL CITY COUNCIL area.

As Chairman of the Infrastructure Committee over the last 3 years I am proud of the completion of the Queen's Drive road upgrade, the Bluff water pipeline, Lindisfarne roundabout and the start of the Braxholme water plant renewal. This is the core business of Council and continued asset management means that Council can deliver quality water, drainage and roading to the people of Invercargill.

The most important issue we face is the Government Freshwater Plan which has the potential to require the Council to pre-treat its stormwater. This is ridiculous and has the potential to require in excess of 100 pre-treatment plants throughout the city. The estimated rate burden is between \$500 - \$1000 extra per ratepayer per year. This is not scaremongering but FACT. A vote for LINDSAY THOMAS will be a vote against this ludicrous plan that has no proven scientific data to back it up. Vote LINDSAY THOMAS.
