

# INVERCARGILL CITY COUNCIL

## Electing 12 City Councillors

---

### **Regan THWAITES**

My principal place of residence is in the INVERCARGILL CITY COUNCIL area.

Through Experiences with Youth Council, Research Projects with NZ Treasury and Parliament and Child, Youth and Family Friendly Subcommittee, my passion for Invercargill has

magnified. In conclusion, not one single idea will ensure the future. A whole strategy is required.

My strategy ....

Families are the ideal investment for a city. They represent commitment to the region, contribution to community and tourism through visiting friends and family. These benefits are more beneficial to Invercargill than what other demographics provide.

Affordability is key to Invercargill's potential to locals and new residents. Specifically focussing on affordability for families will make Invercargill unique. While also offering a balanced lifestyle filled with choices towards living, learning and earning. Local Economy cannot be improved individually, it is a result of a positive and successful calculation. I believe combining population growth with affordable incentives will create vibrancy for the CBD and economy.
