

Invercargill City Council

Electing the Mayor

Nobby CLARK

LETS GO Invercargill

My principal place of residence is in the Invercargill City Council area.

I am currently the Deputy Mayor.

My priority if I become Mayor is for better leadership and governance of council.

I can get a new museum built and open in 3 years without any increase to our forecasted rates.

I will also drive a review of some projects where I believe the costs cannot be justified.

I am strongly opposed to the governments' 3 waters reform.

We can deliver quality drinking water cheaper than being in a water entity where we subsidise other councils. Our priority needs to be to locate an alternative water supply.

I support an increased level of city beautification as too much of our city still looks tired.

I am also a supporter of SdE disability workers at the recycling plant retaining their jobs until 2027 and then beyond.
