# INSPECTIONS, MAINTENANCE AND REPORTING (ADDRESS THOSE ITEMS THAT APPLY)

Minimum inspection and maintenance procedures:	Regular inspection and responsive maintenance will be carried out in accordance with the nominated performance and inspection standard of the associated system, and to ensure signs remain correctly positioned and legible and, where appropriate, ensure the escape route is identified.
Inspection frequency and responsibility:	Depending on the type of installation and its performance standard/document: Specifically designed solutions: by IQP only Standard /other document: Daily by owner / representative (for Risk group CA / Purpose groups CS, CL, CO, CM) Monthly by owner Monthly by IQP only (for other Risk group / Purpose groups) Annually by IQP only

INSPECTIONS	S, MAINTENANCE AND REPORTING (ADDRESS THOSE ITEMS THAT APPLY)
Inspections & Maintenance: <i>Monthly</i> <i>Inspections:</i> <i>Annual</i> <i>Inspections:</i>	Illuminated signs will be inspected to ensure they are:         The correct type         Present and in the right locations         Legible         Performing as required e.g. illuminated signs are illuminating.         Signs not required to be illuminated will be inspected to ensure they are:         The correct type         Present and in the right locations         Legible         Legible         Legible         Legible         Signs not required to be illuminated will be inspected to ensure they are:         Legible         Legible         Legible
	<ul> <li>Signs required to be illuminated will be tested to ensure they:</li> <li>Remain illuminated in the event of a failure of the main lighting supply, for the same duration as required by Building Code Clause F6 Visibility in Escape Routes.</li> </ul>
Specific considerations:	<ul> <li>SS 12 Audio loops or other assistive listening systems</li> <li>Checks will be made to ensure the following signs or displays are present and in the right locations, where required.</li> <li>Approved international signage indicating audio loop availability is displayed at entrances to the venue, auditorium, room or area.</li> <li>A map or a display of the area covered by the audio loop, its location if coverage is limited within the venue, and directions to the indicated area are displayed</li> <li>Where counter loops are installed, each counter displays a sign indicating availability.</li> <li>The transmission channel used for the venue is displayed at the entrances to the venue to allow users to adjust their receivers to the frequency channel in use.</li> <li>SS 13/2 Natural smoke control</li> <li>Checks will be made to ensure any operational signage for the ventilator is still in place and legible.</li> </ul>
Reporting:	<ul> <li>The owner will keep records of all inspections, maintenance and repairs undertaken in the previous 24 months. These will be recorded in the on-site log book or electronically, which will remain available with the most recent compliance schedule, and as a minimum include:</li> <li>Details of any inspection, test or preventative maintenance carried out, including dates, works undertaken, faults found, remedies applied and the person who performed the work.</li> <li>Form 12A provided annually by the IQP.</li> </ul>
