APPLICATION FOR ROADSIDE GRAZING PERMIT

Please Note: The following conditions must be followed:

- The placement of any temporary fences must give consideration of all road users, including pedestrians, and shall not enclose both sides of the road at any one time.
- Only stock-proof electric fences shall be permitted. These shall only be constructed of approved flexible electric fencing standards with a minimum of three wires except a single wire will be permitted for adult large animal stock (i.e. not sheep). Steel waratahs are not permitted. Wooden corner posts may be used for tensioning purposes provided they are no larger than 100 mm diameter.
- All fences shall be erected in compliance and accordance with the requirements of the Electricity Act 1992 and the Electricity Safety Regulations 2010. Fences shall be suitably labelled notifying the public that the fence is live.
- The fence shall be erected no closer than 1.0 metre from the edge of the road surface or 4.0 metre from the road centreline or 0.5 metres from the water channel whichever is further from the centreline.
- A maximum length of 200 metres of fencing is permitted for temporary grazing at any one time and this shall be relocated at least every 10 days. These limits may be extended, subject to written permission only in special circumstances.
- Waterways are to be fenced 2.0 metres back from the top of the bank to prevent stock intrusion.
- All temporary fences should only remain in position while the roadside is being grazed, and must be completely removed immediately afterwards.
- The applicant who erects the fence shall be responsible for the cost of reinstatement of any underground services damaged and the clearing and reinstatement of all inlets, water channels, culverts, culvert markers, edge marker posts, and cut-outs within the area.
- All stock shall be removed from the road reserve during the hours of darkness, unless special permission is granted.
- The Council shall not be held responsible in any way for claims for damages and it is a condition of the issuing of this permit that the applicant/property owner arranges and keeps in force Public Liability Insurance to protect their liability for damage to third parties.
- The Council may revoke the permit at any time and request all fencing be removed within 48 hours.
- The Applicant must abide by Australian/New Zealand Standard™ Electrical Installations – Electric Fences AS/NZS 3014:2003.

**FAILURE TO COMPLY WITH ALL THE CONDITIONS WILL RENDER THE PERMIT
INVALID**
