### Inspections

Final exits located in a means of escape shall be inspected to ensure occupants are not prevented from leaving the building in the event of an emergency. Final exits located in a means of escape must be inspected monthly or annually.

Specifically designed solution prepared by a person who, on the basis of experience and qualifications, is competent to do so. (Details provided)

Other

## Maintenance

Final exits must be maintained at all times in a safe condition with particular attention to:

- Freedom from obstructions
- Locking, blocking and barring
- Ease of opening any door leading into the escape route and at the final exit

Specifically designed solution prepared by a person who, on the basis of experience and qualifications, is competent to do so. (Details provided)

Other

## Inspections, Maintenance and Reporting (address items that apply)

### Minimum inspection & maintenance procedures

Regular inspection and responsive maintenance will be carried out to ensure occupants are not prevented from leaving the building in the event of an emergency.

### Inspection frequency and responsibility

Depends on the type of installation and its performance standard/documents defined in Fire Safety & Evacuation of Buildings Regulations, 2006:

Specifically designed solutions: by IQP only

Standard / another document:

Daily by owner / rep (for Risk group CA / Purpose groups CS, CL, CO, CM

Monthly by owner

Monthly by IQP

Annually: by IQP

### Building requiring daily inspections
